TEACHER SURVEY RESULTS

OUTREACH
TEACHER SURVEY INTRODUCTION

Teachers across all school sites were asked to participate in an online survey in early February 2020. The questions focused on the functionality of their respective existing school facilities, primarily around the following topics:

- Enhancing the teaching and learning experience
- Important adjacencies
- Spaces for gathering, social interaction, reflection, and belonging
- Access to media and technology
- Safety and security of your campus
- Professional development at your school
- Spaces requiring the greatest amount of improvement at your school

Teachers were asked if specific spaces and/or features are currently provided at their school and to what extent.

- Currently Exists
- Exists to Some Extent
- Does not Exist

Follow-up questions asked them to rank the top three spaces (or features) that they felt were most important in enhancing the teaching and learning environment at their school.

Opportunities for additional feedback in an open-ended format were provided to allow teachers to elaborate on specific concerns and/or add items that were not covered by multiple choice options.

There were a total of 187 responses submitted. The results are illustrated on the following pages.
